What is EZAccess?

- EZAccess is a web proxy server that allows authorized users to access IP-restricted electronic resources subscribed by UiTM library such as databases, e-journals and e-books. As the e-resources are licensed to UiTM only, users are required to use a login ID and password for authentication for off campus/remote access.
Step by Step on How to Access Online Databases/eBooks via EZAcess

1. Log on to the library’s website [http://nsembilan.uitm.edu.my/library/](http://nsembilan.uitm.edu.my/library/)
2. Click on Online Databases or eBooks
3. Click on Off Campus Access (red button)
4. Key-in ID and Password to log in into EZAcess

**EZAcess ID**: Student Number or Staff Number

**Password**: I/C Number without hypen (-) or Passport Number
5. After being successfully logged in into EZAccess, the online databases/ebooks page will appear.
6. Click on Subscribed Databases or eBooks to view the list.

Online Databases - EZAccess

Subscribed Databases

This page provides links to databases and e-book providers. Some common content you can find in databases are journal articles, conference papers, news articles, statistics, images, and patents. You can access a database either via the alphabetical or broad subject categories listed.

Most online databases are accessible by direct login requiring no authentication or password. Restrictions apply to resources that require individual username and password. This information is available from the menu available at particular campuses or library workstation.

Click on "more info.." to view more information about the database.

ACM Digital Library (DL)

The ACM Digital Library (DL) is the most comprehensive collection of full-text articles and bibliographic records in existence today covering the fields of computing and information technology. The full-text database includes the complete collection of ACM's publications, including journals, conference proceedings, magazines, newsletters, and multimedia titles.

more info...
7. Click on “more info” to view additional information about a database
8. Choose a database or an ebook provider to enter and start a search
EZAccess is a web proxy server used by libraries to give access from outside the library’s computer network to restricted-access websites that authenticate users by IP address. This allows library patrons at home or elsewhere to log in through library’s EZAccess server and gain access to online databases which UiTM subscribes.
